Physical damage as extra elemental damage

3.3 rewrote the formula of every item that adds part of your physical damage as extra elemental or poison damage. Per the patch notes, elemental crits no longer double-dip on spell damage, stats are no longer counted twice (these items were “dealing way more damage than intended”), and elemental crits now work at any Deadly Strike value. The new formulas also get a bonus from the Blacksmith specialization perks. Expect less damage than in 3.2.24 from all of them; only Voidforge's displayed stats changed.

Item	Effect (what changed in the formula)	Item stats changed?
Voidforge Mythical Abyssal Blade	100% of physical damage as a random element (fire, cold or lightning); elemental crits. Patch: “was not working as intended”.	NERF ED 250-500% → 100-200%, –150 min/max damage, –(1-10) Elemental Fury
Doomfletch's Prism Mythical Marksman Bow	25% of physical damage as each element; Dexterity now counts at ¾ instead of in full.	No
Gargoyle's Bite Winged Harpoon	50% of physical damage as instant poison; Strength now counts too (¾ Str + ¾ Dex instead of full Dex).	No
Icing Death Rapier	Ice Fury: 50% of physical damage as cold; the cold crit now scales with your total elemental/cold damage bonuses instead of Cold Mastery.	No
Earth Shifter Thunder Maul	–50% total physical damage, but fire damage equal to your physical damage; Strength counts ×1.2 in the new formula.	No (typo fix only)

Patterns worth knowing

- Many “x% Deadly Strike” lines became the new **“x% Deadly Strike Damage”** stat (The Annihilator, Razor's Edge…), and many items gained it.
- New stats show up on reworked items: **Crushing Blow Damage**, **+x to Maximum Curses**, **Utility Potion Effectiveness / Duration**, **Increased Effect of Gems / Runes / Jewels Socketed in this Item**.
- Low-chance “on striking” procs often became high-chance “on melee attack” procs.
- Some “Level x Aura When Equipped” lines became “+x to the skill” instead (Hacker – Fanaticism, Atlastrust – Might, Icon of Sin – Meditation): you now have to run the aura yourself.
- Weapon masteries on uniques only changed wording, but the patch reworked two masteries themselves: Reflex Bow (Deadly Precision) and Sorceress Orb, which now triples spell cooldowns (Staff of the Horadrim).
- Fixes without stat changes: The Ties That Bind can drop; Yaerius' Celestial Beacon no longer uses up ammo (get a new one); Ravenlord / Head of the Cerberus wolf limit; larger unique charms can be upgraded with Standard of Heroes; item effects with a condition now give 0 instead of 1 when the condition is not met.

Runewords

Only four runewords changed in the game data; the rest of the runeword page differences are its new layout. Rune and jewel socket bonuses are unchanged.

Kanji runewords with jewels Shinigami, Moonlight, Dragon Master, Storm Earth and Fire, Gold Scarab, Tourbillion	FIX	72 new recipe rows so mixed Jewel / Mythical Jewel combinations work (patch note: "certain kanji runewords could not be made with certain jewels"); stats unchanged	—
Lord Sword, Scepter, Spear, Axe	FIX	"Paladin Sword" dropped from the allowed bases list; Paladin Swords are Swords, so it can still be made in them (no real change)	~~Allowed: Sword, Scepter, Spear, Axe, Paladin Sword~~ → **Allowed: Sword, Scepter, Spear, Axe**
Moonlight Missile Weapon (kanji)	FIX	Its "resets when you take damage" trigger used Pride's internal reset skill; now has its own (bug fix, stats unchanged)	—
