Other item changes

- **Corruption:** Magic items can now be corrupted. Every quality except runewords uses one pool per item slot. A failed corruption now always gives a Rare item of the same type; crafted, low, normal and superior items used to keep their quality.
- **Vessel of Souls:** Its anointment is now stored and only applied when you transform the Vessel into a mythical weapon, rolling that weapon type's normal pool. The separate Vessel anointment list is gone.
- **D-stoning:** Caps now land on round numbers: Attack Speed and Cast Rate 121 → 120, Attack Rating and damage to demons or undead 504 → 500, Crushing Blow and Deadly Strike 102 → 100, Light Radius 12 → 10, Magic Damage Reduced 48 → 45.
- **Rune forging:** Sa rune now forges the right bonus on gloves. Orbs and the Mythical Arcane Staff can be rune forged.
- **Charms:** Rerolls keep the charm type. Small and Grand Charms can hold one socket, but Larzuk refuses every charm. A socketed Deviant Cell can be upgraded with the Standard of Heroes.
- **Power Overwhelming:** Gemwords can no longer be made into magic items, and the regular magic item socket recipe is off while you have the perk.
- **Ancient Scrolls:** A scroll can be downgraded one number in the cube again.
- **Token of Absolution:** New recipes for two and three tokens at once.
- **Map bosses:** Pandemonium key from tier 2, 3 and 4 bosses: 25% → 35%, 50% and 75%. Tier 5 map from Rathma and Lucion: 25% → 50%. The terrorized Lich King keeps his Frostmourne / Essence roll.
- **Stash:** All Alien Artefacts fit in the currency tab.
- **Skill:** Wisdom of Athulua starts with +10% to all speeds.
