BUFF clearly better NERF clearly worse MIXED some up, some down (or depends on build) REWORK new role or stat set — better or worse depends on your build FIX text or bug fix, no stat change NEW added in this version REMOVED taken out of the game

Lines marked ~~old~~ → **new** changed value; – removed; + added. The docs now print every bleed length that read “over %.2f seconds” in 3.3.03 (85 lines on the unique and runeword pages) as the game file length ÷ 25 seconds, the bleed plugin’s rule; the game files did not change, so items with only that difference are not listed. That makes Throatslitter’s 0.12 seconds (the 3.3.03 report read it as 3). Patch-note fixes with no stat-line change: physical damage added as elemental or poison damage now works again on Voidforge, Icing Death, Earthshifter, Gargoyle’s Bite and Doomfletch’s Prism (skills.txt raises the floor of their damage-bonus term from −90 to 0; Gargoyle’s Bite now reads your throwing damage). “Ironbolt life on striking” is the Ironbolt ascendancy, not a unique: see the Ascendancy section. Verdicts are a reading of the stat lines, and nothing here was tested in game.

Ascendancy Stones (removed)

ESR 3.3.04 removes the Ascendancy Stone and moves the whole system into a panel. All 1,859 ascendancy rows of cubemain.txt are gone (stone recipes, tier transmutes, soulstone captures, Lich King bonus and their trap rows). The tier bonuses themselves are the same as the old recipes, with the exceptions listed below; tier 3 and 4 scaling formulas only gained the Lich King factor. Old checks on the never-set stat ascendancy_upgrade were removed from the tier 3 auras; they had no effect.

Item	Verdict	Summary	Old → New
Ascendancy Stone Charm (ast), 15 kinds	REMOVED	The charm that held your ascendancy is gone; ascendancies now live in a panel on the character sheet. A character that enters a game holding a stone (and has no ascendancy yet) loses the stone and gets the same ascendancy, tiers, captured soulstones and Lich King bonus in the panel, once.	– Ascendancy Stone: one per ascendancy, one equipped at a time, cannot be shared with other characters, cannot be corrupted, anointed or broken down for Maple Leaves + Ascendancy panel: button next to the specializations on the character sheet, shown once the Orb of Creation is used; one page per ascendancy with its five tiers and the next challenge + “New ascension tier unlocked” notice on the HUD for 5 seconds + Renounce Ascendancy (with a confirmation): removes the ascendancy, every tier, your Primordial Soulstones and the Lich King bonus, and resets the used orb The stone item and its 15 uniqueitems.txt rows stay in the files only for this conversion; no recipe makes a stone any more.
Orb of Creation Misc (u16)	REWORK	Now a consumable: use it to unlock the Ascendancy panel (only while you have not used one). It is still made from the 5 Orbs of Elements; that recipe is unchanged.	~~You must discard your current ascendancy stone before creating a new one~~ → **Use to unlock an ascendancy** + Usable (right-click); sets the hidden ascendancy_orb stat; usable only while that stat is 0

Item	Verdict	Summary	Old → New
Tier 1: Ascendancy Stone recipes cubemain.txt, 15 recipes × 8 classes	REMOVED	You no longer cube the orb with gems; you pick any ascendancy in the panel and press Ascend. Tier 1 bonuses unchanged.	− Orb of Creation + 2 Blemished Sapphire + 2 Blemished Obsidian → Battlemage Ascendancy Stone − Orb of Creation + 1 Blemished Obsidian + 1 Blemished Sapphire + 1 Blemished Emerald + 1 Blemished Ruby → Awakened Ascendancy Stone − Orb of Creation + 2 Blemished Obsidian + 2 Blemished Emerald → Blademaster Ascendancy Stone − Orb of Creation + 2 Blemished Emerald + 2 Blemished Ruby → Nomad Ascendancy Stone − Orb of Creation + 2 Blemished Obsidian + 2 Blemished Ruby → Ironbolt Ascendancy Stone − Orb of Creation + 2 Blemished Emerald + 2 Blemished Sapphire → Arcanist Ascendancy Stone − Orb of Creation + 2 Blemished Ruby + 2 Blemished Sapphire → Soul Warden Ascendancy Stone − Orb of Creation + 4 Blemished Emerald → Sharpshooter Ascendancy Stone − Orb of Creation + 4 Blemished Sapphire → Starborn Ascendancy Stone − Orb of Creation + 1 Blemished Ruby + 1 Blemished Obsidian + 1 Blemished Sapphire → Bloodmage Ascendancy Stone − Orb of Creation + 4 Blemished Ruby → Lifebreaker Ascendancy Stone − Orb of Creation + 1 Blemished Ruby + 1 Blemished Obsidian + 1 Blemished Emerald → Worldshaper Ascendancy Stone − Orb of Creation + 1 Blemished Obsidian + 1 Blemished Emerald + 1 Blemished Sapphire → Stance Dancer Ascendancy Stone − Orb of Creation + 1 Blemished Emerald + 1 Blemished Ruby + 1 Blemished Sapphire → Mana Warden Ascendancy Stone − Orb of Creation + 4 Blemished Obsidian → Berserker Ascendancy Stone + Use the Orb of Creation, then Ascend on the ascendancy's page (no gems)
Tier 2 Nihlathak, Hell	REWORK	Same challenge, but the tier unlocks by itself on the kill; no transmute and no 60-second window. Tier 2 bonuses unchanged.	~~Kill Nihlathak in his domain on Hell, then transmute the stone by itself while the kill swirls are active~~ → **Unlocks by itself when Nihlathak dies on Hell, for every living player in his level**
Tier 3 Uber Tristram	REWORK	Same challenge; unlocks by itself and no longer costs a Maple Leaf. Tier 3 bonuses unchanged (but see Battlemage and Bloodmage below).	~~Kill Uber Diablo, Mephisto and Baal within one minute without dying, then transmute the stone with a Maple Leaf~~ → **Unlocks by itself: all three die within 60 seconds while you are in the level, without dying in between**
Tier 4 and Primordial Soulstones Primordial Soulstone (u19)	REWORK	No more cubing soulstones one at a time or paying 2 Maple Leaves: every soulstone you hold is absorbed into your character, and the 10th unlocks tier 4 by itself, with no other tier needed. Tier 4 bonuses unchanged (but see Ironbolt, Soul Warden and Stance Dancer below).	− 150 recipes “Primordial Soulstone 1–10”: one soulstone at a time into the stone (stone line “Primordial Soulstones Captured: n/10”) ~~Stone with 10/10 soulstones + 2 Maple Leaves → tier 4~~ → **Soulstones in inventory, cube, stash or on the cursor are taken in, up to 10; at 10 tier 4 unlocks by itself** + Progress shown in the panel: “Next tier: capture Primordial Soulstones (n/10)”; soulstones captured in an old stone carry over
Tier 5 Tier 5 map bosses	REWORK	Same challenge; unlocks by itself and no longer costs 3 Maple Leaves. Tier 5 bonuses unchanged (Mana Warden gains its listed poison resist, below).	~~Kill any tier 5 map boss, then transmute the stone with 3 Maple Leaves while the swirls are active~~ → **Unlocks by itself when Mephisto, Diablo or Baal the Invincible, the Lich King, Korlic, Talic or Madawc the Eternal, Lucion or Rathma dies**
Lich King bonus The Lich King at /players 8	REWORK	No longer +1 to All Skills; instead every tier 3 and tier 4 scaling bonus is 10% stronger. Unlocks by itself on the kill. (The old recipe was not on the old docs page.)	~~Kill the Lich King at /players 8, then transmute the stone with a Null Rune~~ → **Unlocks by itself when the Lich King dies at /players 8** − +1 to All Skills + +10% to the tier 3 and tier 4 stat-scaling bonuses (skills.txt: each formula × (100 + 10) / 100)

Item	Verdict	Summary	Old → New
Tier 3 and 4 bonus texts item-modifiers.json, 31 strings	FIX	Formatting only: the purple colour code is gone and two-line texts became one sentence. The numbers are the same in every string except Bloodmage's summon damage (below).	~~ÿc@Gain 1% Spell Damage for every 2% Deadly Strike and for every 2% Crushing Blowÿc0~~ → **Gain 1% Spell Damage for every 2% Deadly Strike and for every 2% Crushing Blow** ~~ÿc@Gain 2% Bonus to Attack Rating for every 1% Pierce / Gain 1 Maximum Damage for every 2% Pierceÿc0~~ → **Gain 1 Maximum Damage for every 2% Pierce. Gain 2% Bonus to Attack Rating for every 1% Pierce** Same kind of change for the other 13 ascendancies (tier 3 "…tierone", tier 4 "…tiertwo") and the Stance Dancer blue-stance line.
Battlemage tier 3 Spell damage from DS and CB	NERF	Weapon-mastery critical stats no longer count toward the spell damage bonus; only Deadly Strike and Crushing Blow do.	~~(Crushing Blow + Deadly Strike + melee mastery crit + throwing mastery crit) / 2~~ → **(Crushing Blow + Deadly Strike) / 2**
Bloodmage tier 3 Summon damage from life	NERF	Summon damage now needs 400 life per 1% instead of 375. The docs page already said 400; the game files now agree.	~~1% Summon Damage for every 375 Life~~ → **1% Summon Damage for every 400 Life**
Ironbolt tier 3 and 4 Life on striking from Strength	FIX	Patch note: life on striking was granted twice. The tier 3 aura also gave the tier 4 bonus; now only tier 4 does, so you get the documented 1 per 200 Strength once (half of before at tier 4, none at tier 3).	− Tier 3 aura: 1 Life on Striking for every 200 Strength (in addition to the tier 4 one)
Lifebreaker Life Pact Tier 5 skill	FIX	Patch note: Life Pact drained twice the intended life. The drain was in both the tier 3 and tier 4 auras; now only in one.	− Tier 4 aura: second copy of the Life Pact life drain
Soul Warden tier 4	NERF	The old recipe also gave +1% to maximum magic and poison resist (not on the docs page); the panel does not.	− +1% to Maximum Poison and Magic Resist (property max-magic-pois-res)
Mana Warden tier 5	BUFF	Poison Resist +75% was on the docs page but the old recipe did not grant it; the panel does.	+ Poison Resist +75%
Stance Dancer tier 4	NERF	The old recipe also added a hidden aura (skills.txt "Stance Dancer Ascendancy Tier 4": damage reduction, run speed and life regeneration by Strength, Dexterity or Energy); the panel does not. Not on either docs page, and whether it did anything in 3.3.03 is not clear from the files.	− Hidden aura "Stance Dancer Ascendancy Tier 4"
Ascendancy plugin config celestialrayone.ascendancies.toml	NEW	New 577-line config for the new ascendancy plugin. It holds everything the stones and recipes used to.	+ The 15 ascendancies, in window order, with every tier's properties and texts (same values as the old recipes except the rows above) + Tier triggers: Nihlathak on Hell → tier 2; Uber Diablo, Mephisto and Baal within 1500 frames (60 s) → tier 3; any of 9 tier 5 map bosses → tier 5; the Lich King with /players 8 life → Lich King bonus + Soulstones: item u19, cap 10, the cap grants tier 4 + Old-stone conversion: stone → ascendancy, tiers 2–5, captured soulstones and Lich King bonus + Renounce also clears soulstones and the Lich King bonus + 18 kill-credit entries for the Kill Ledger and Rathma's Eternal Skull (see the next section)

Kill Ledger

Boss kills used to cast a "Just Killed …" curse on players near the boss for 60 seconds (monprop.txt death skills; aura range 100 in skills.txt). 3.3.04 removes those kill-credit death skills from all 24 boss rows in monprop.txt (including Nihlathak and Uber Tristram, which now drive

ascendancy tiers 2 and 3) and the plugin gives the same kill credit value to every living player in the boss's level for 1500 frames (60 s). The “Just Killed …” skills are still in skills.txt, unchanged. The Kill Ledger item, its 91 cube rows, Rathma's Eternal Skull recipes and the docs page are unchanged, so every bonus value is unchanged.

No changes

- **Unique jewelry, charms and jewels:** No change beyond Atma's Scarab's filled-in bleed length.
- **Mythical uniques:** No change beyond two filled-in bleed lengths (Natalya's Bloodied Executioner, Monkey King's Bar).
- **Set items:** No set item changed (sets page and setitems.txt identical).
- **Runewords:** No runeword changed. runes.txt is unchanged; the only page differences are the filled-in bleed lengths. Rune and jewel socket bonuses are unchanged.
- **Gemwords:** No gemword changed (gemwords page and game files identical).

Other item changes

- **Formula changes without a stat-line change:** Famine, Dreamflange, Agent of the Light and Barbaric Devastator now scale with the Blacksmith Modifier Magnitude perk. As written in skills.txt these formulas multiply by 10 (11 with the perk) without dividing back, unlike the other items' formulas, which reads as ten times the old effect (a hundred times for Dreamflange and Agent of the Light's damage). That looks like a slip in the files; not tested in game.
- **New magic suffix:** "of Skill Master", +(10 to 20) to Pounce, on spears (item level 96, required level 60).
- **Alien Artefacts:** now stack in the materials tab (patch note: they could not be deposited in the currency tab).
- **Flask of Renewal and Nirvana Grass:** now go to the belt when picked up.
